FUTURE

# ITAP SUPPLIERS

## NEW CHALLENGES AND PERSPECTIVES FOR THE FUTURE

When it comes to **suppliers**, Itap also has very **clear ideas for the future**:

the company aims to **continue to collaborate** with suppliers with a **team game aimed at involving them directly, designing and growing together**.

Pursuing **this path** plays a **key role in creating solid relationships**, growth and **optimal end results**.

All this is very **important for Itap**, which in turn is a **supplier** and **expects to guarantee its customers high quality products and services**.

**Its success** will always go **hand in hand with its relationship with the supplier**, whether it is an **established** or an **entirely new one**:

whether **machinery, service, typography and technology providers**, Itap will **always follow the path of collaboration and teamwork** with its **suppliers**.

**BOX MULTIFIT**: packaging studied in terms of materials, structure and design with our trusted supplier, a display “stolen” from luxury goods to best present a product on which the company relies heavily and to build a strong Brand Identity.
