FROM SMALL ARTISANS TO INTERNATIONALLY RENOWNED REALITY

ITAP TODAY: A SUCCESSFUL MADE IN ITALY COMPANY

In 1972, Itap was a small craft business in a room under the house.

Over the years, with a lot of hard work, passion and hope, it has grown more and more: today it covers a total of almost 40,000 m², divided between the establishment in Lumezzane and the one in Rodengo Saiano, with more than 180 employees and over 200 machines.

For those who have never visited it and for those who would still like to, Itap has created an innovative way to discover it at 360° from the comfort of any part of the world: THE VIRTUAL TOUR!

A journey within reach of your PC, tablet or smartphone to discover production and assembly departments, warehouse, machines, offices and much more!

In addition to the virtual tour of the rooms, in the various areas you can watch production videos, interviews with employees, documents and in-depth information, which can also be downloaded.

Enjoy the **VIRTUAL TOUR**:

FROM SMALL CRAFTSMEN TO INTERNATIONALLY RENOWNED REALITY

ITAP TODAY: A SUCCESSFUL MADE IN ITALY COMPANY

From the very beginning **Itap** has **espoused the culture of Made in Italy** and has made this choice a **corporate philosophy** that over time has become a **guarantee of safety, quality and value**.

Thanks to this philosophy, today Itap is a **leader in the production of plumbing technology** and is **known all over the world** together **with its valves**, which are synonymous with high quality everywhere.

Itap produces around 10 million ball valves every year, both for **water** and **gas**, suitable for use in **plumbing, heating, air conditioning and pneumatic systems**.

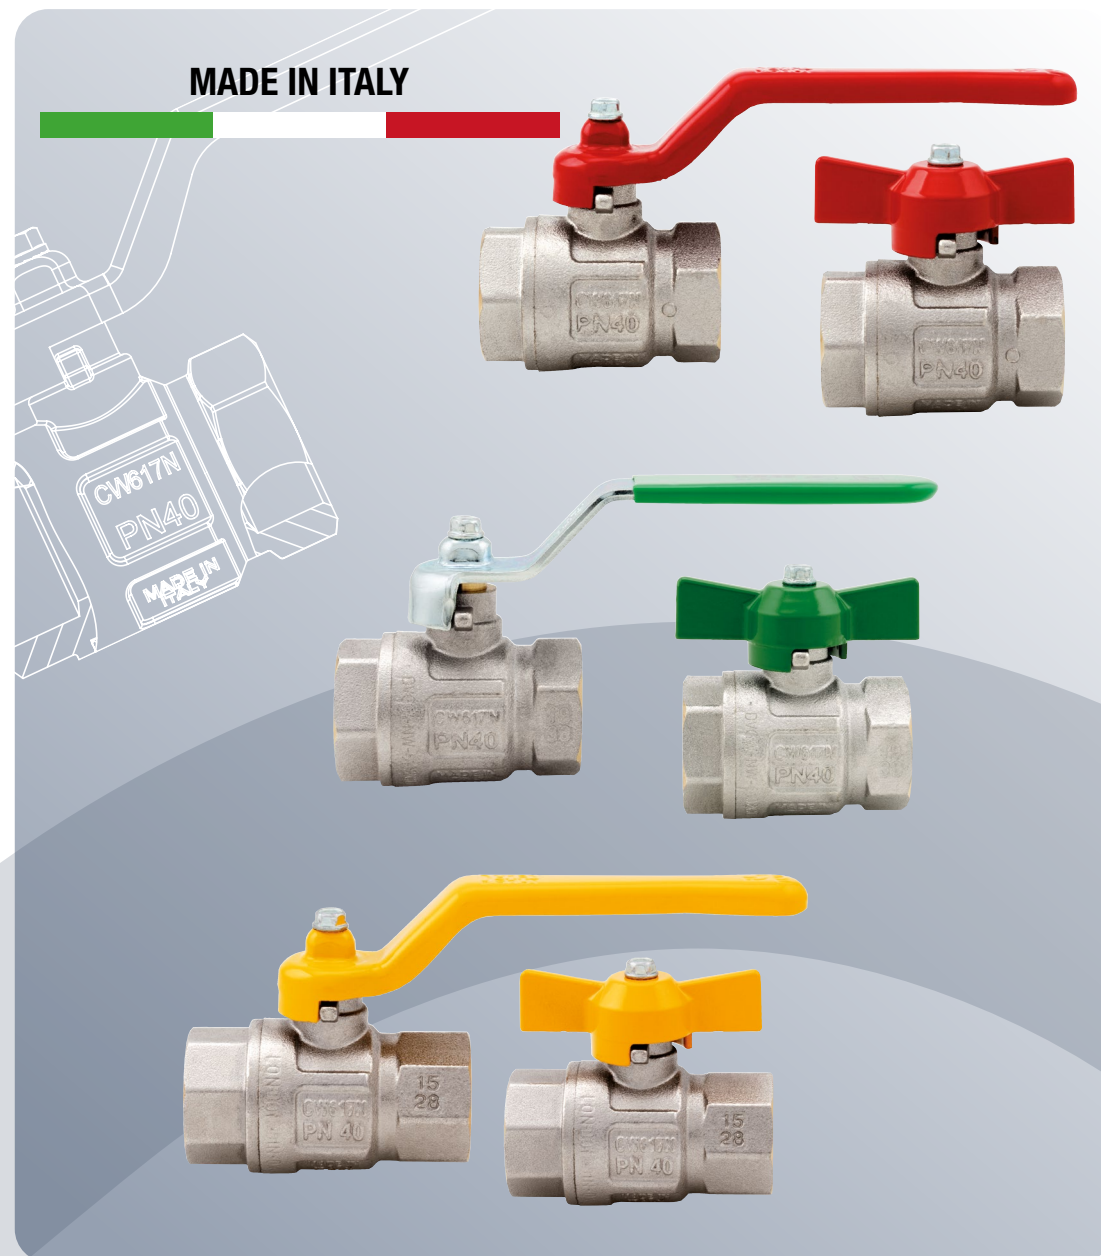

Their **special features** are:

- the different types of **passage** (total or standard),
- the different types of **threading**,
- the different types of **handle** and their **colour**

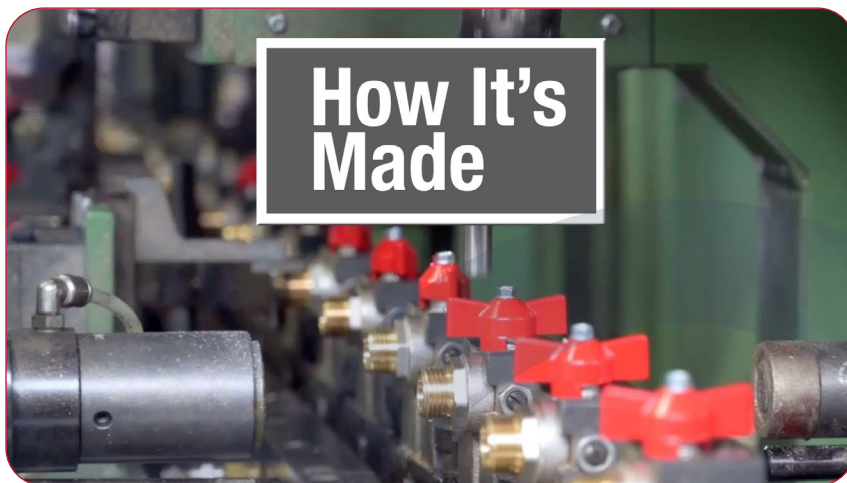

In addition, some **Itap valve families** are **approved according to important certifications**:

- **GREEN** and **IDEAL** are **DVGW-certified** according to **EN13828** for the distribution of water intended for human consumption, or for **drinking water** and **anti-legionella**.
- **LONDON** and **BERLIN** are **certified** according to **EN331** for installation on gas-fired systems.

FROM SMALL CRAFTSMEN TO INTERNATIONALLY RENOWNED REALITY

ITAP TODAY: A SUCCESSFUL MADE IN ITALY COMPANY

But having said that, have you ever wondered how a ball valve is manufactured?

Itap explains it to you with its **project How it's made**, an exciting journey behind the scenes made of materials, machinery, people and passion for the job that will show you in detail all the stages of production of a ball valve!

Enjoy the video:
[HOW IT'S MADE](#)

DID YOU KNOW THAT...?

On **7 May** at the **Lumezzane** site and on **14 May** at the **Rodengo** site, **'FAMILY DAY'** took place for the first time in Itap's history.

The company opened its doors to children and adults to give them the chance to see where their loved ones work.

A **guided tour** to discover all the **production departments** enriched with food trucks, games and fun for a wonderful family experience!

Itap is proud of the success of the two days and of having seen its employees and families very involved, intrigued by the guided tour and enthusiastic about the entertainment.

FAMILY DAY - Lumezzane

FAMILY DAY - Rodengo Saiano
